

FIRM VALUATION

RightExit Sample Firm

What your firm is worth today, what it could be worth with the right acceleration plan, and what stands between the two.

CURRENT VALUE

\$2,320,000

OVERVIEW

Today: \$2,320,000.

With work: \$4,250,400.

Your firm's enterprise value is the product of two numbers: adjusted EBITDA and the multiple buyers will pay for it. Both are addressable, and both can be moved over a 12-36 month horizon with the right pre-sale work.

SELLABILITY GRADE

C

70.3% · probability Medium

ADJUSTED EBITDA

\$580,000

17.1% margin · 4.00x multiple

VALUE CREATED IF YOU ACT

+\$1,930,400

83.2% above today

ACCELERATION SCENARIOS

Three levers, one compound outcome.

Each row shows what a single lever does in isolation. The final "All three combined" row applies them compounded. That is the realistic ceiling at a sale, not a sum.

Today (baseline)		\$2,320,000	
Grow revenue 10%		\$2,552,000	+\$232,000
Improve operating margins		\$3,680,000	+\$1,360,000
Reduce risk ' higher multiple		\$2,436,000	+\$116,000
All three combined		\$4,250,400	+\$1,930,400

SELLABILITY BREAKDOWN

Why your sellability is C.

Buyers value firms on EBITDA and multiple, but they only pay top dollar when the firm will actually transfer. Sellability is the score of how cleanly the firm transitions: governance, financials, key-person risk, client concentration, and the partner's own readiness.

Owner readiness

SCORE

24 / 60

Exit timeline, post-sale plan, capacity to prep the firm between busy seasons, and partner alignment.

Business risk

SCORE

100 / 150

Financial hygiene, client concentration, advisory mix, practice management stack, malpractice exposure, single points of failure.

EBITDA build

Adjusted EBITDA is your pre-tax profit plus non-cash items, plus the portion of your salary above a market-rate replacement, plus rent paid to yourself, plus one-time discretionary spend. This is the number a buyer actually capitalizes.

EBITDA

\$580,000

17.1% of revenue

SIZE SCORE

25

Larger EBITDA bands earn premium multiples

MULTIPLE USED

4.00x

Risk-adjusted band, CPA firm comps

WEALTH GAP

Will the sale fund your retirement?

The valuation only matters if the proceeds fund the life you want after the sale. This page bridges from the projected sale price to your post-sale income goal.

INCOME TODAY \$550,000 Total annual draw from the firm	PORTFOLIO NEEDED \$6,333,333 To produce desired income at 7.5%	GAP TO BRIDGE \$4,908,333 Sale must net at least this much
---	---	---

Target sale price (gross, before fees & taxes): \$5,399,167

NEXT STEPS

What to do with these numbers.

A valuation is a starting point, not a verdict. If you want to move the numbers (by tightening the firm, improving margins, or finding the right buyer), the next conversation is about how, not whether.

WORK WITH SOMEDAY

Matt Cohen runs the first conversation.

Matt is a CPA who sold his own firm through Sara, then joined Someday. The first 15 minutes are about whether this is the right time. About half of those calls end with "not yet, here is the plan to revisit in 12-24 months."
